2017 | ISBN-10: 1498758266 | 265 pages | PDF | 10 MB This book is intended primarily as a textbook for students studying structural engineering. It covers three main areas in the analysis and design of structural systems subjected to seismic loading: basic seismology, basic structural dynamics, and code-based calculations used to determine seismic loads from an equivalent static method and a dynamics-based method.

size of the earthquake (amount of energy released). It is expressed as a number usually from 1-10. In reality the top end of the scale is open. In order for an earthquake of 10.5 to occur would require a fault that circles the Earth to move at once – no such fault exists. The largest earthquake ever recorded was a Mw 9.5 on May 22, 1960 in Chili.

You should then view the Earthquake Seismology PowerPoint Presentation that provides background information and links to teaching resources on fundamentals of earthquakes. A PDF Guide to Plate Tectonics and Earthquakes is also available. This guide is an outline of the Plate Tectonic and Earthquake Seismology

PowerPoint Presentations.

Introduction to Plate Tectonics and Earthquakes

Defining an Earthquake Defining an Earthquake An earthquake is a natural occurrence, like rain. Earthquakes affect almost every part of the Earth and like rain they can be either mild or catastrophic. Over the course of geological time, earthquakes, floods, and other natural events have helped to shape the surface of our planet.

Defining an Earthquake - FEMA.gov

Earthquakes: introduction An earthquake is a trembling or a shaking movement of the ground, caused by the slippage or rupture of a fault within the Earth's crust. A sudden slippage or rupture along a fault line results in an abrupt release of elastic energy stored in rocks that are subjected to great strain.

What is an earthquake? The movement of Earth's crust resulting from the release of built up potential energy between two stuck tectonic plates! It's like when your teacher loses their marbles because you've asked them the same question 7 times in a row!
