Physics Major. The B.A. Physics Major requires a minimum of 120 hours to graduate. The B.A. Physics Major is suitable for a student seeking a background in physics with less specialization and mathematical rigor than in the B.S. degree in physics.

Department of Physics < University of Northern Iowa

Dr. Croom's Classroom resource site. A place to find notes, problems, worksheets, links, and other information about class. Its focus is on physics but it has links to Math and other science material created by J Croom. This Site is designed and updated by John Croom III, Ed.D., J Croom

conceptual. trajectories-circular.pdf The drawings on the accompanying pdf show a mass on the end of a string as it is spun counterclockwise in a vertical circle.

Centripetal Force - Problems " The Physics Hypertextbook

These operators will "operate" on a wave function, Ψ , which is assumed to exist, and which is assumed to contain all that is knowable about the quantum mechanical system. We would then solve the resulting equation to get the particulars. And so, in this example, we can write the substitutions into the classical expression for total energy.

Intuitive Concepts in Quantum Mechanics - Scriptural Physics

The Standard Model of particle physics is the theory describing three of the four known fundamental forces (the electromagnetic, weak, and strong interactions, and not including the gravitational force) in the universe, as well as classifying all known elementary particles. It was developed in stages throughout the latter half of the 20th century, through the work of many scientists around the ...

Senior Physics - Extended Experimental Investigations

In physics, a force is any interaction that, when unopposed, will change the motion of an object. A force can cause an object with mass to change its velocity (which includes to begin moving from a state of rest), i.e., to accelerate. Force can also be described intuitively as a push or a pull. A force has both magnitude and direction, making it a vector quantity.

modern color theory (concepts) This page introduces the conceptual basis of artists' "color theory" - the traditional body of lore applied by painters and photographers to the design and creation of images.

handprint : modern color theory (concepts)

The incremental learning derives its name from the incremental nature of the learning process. In incremental learning, all facets of knowledge receive a regular treatment, and there is a regular inflow of new knowledge that builds upon the past knowledge.

SuperMemo: Incremental learning

Physicalism is the thesis that everything is physical, or as contemporary philosophers sometimes put it, that everything supervenes on the physical.
