The average person has two or three colds a year. Colds are caused by many viruses, which cause similar symptoms. The same virus can cause another cold after re-exposure. However, the second illness is usually milder and lasts for a shorter period of time. Seasonal patterns may be seen for some of the viruses.

In From The Cold (Novella): The MacGregors Kindle Edition

The Spy Who Came in From the Cold is both brilliant and fascinating, even if it tends to fall apart towards the end of the story. The first half of the book uniquely captures the darkness and cynicism of the Cold War years, as rendered by a writer in possession of some unique angles on that great drama.
