DF-GLS vs. Augmented Dickey-Fuller This is almost completely taken from the Stata 11 Manual&#201;Time-Series. dfgls. tests for a unit root in a time series. It performs the modified Dickey&#201;Fuller

### **DF-GLS vs. Augmented Dickey-Fuller**

A time series is a series of data points indexed (or listed or graphed) in time order. Most commonly, a time series is a sequence taken at successive equally spaced points in time. Thus it is a sequence of discrete-time data. Examples of time series are heights of ocean tides, counts of sunspots, and the daily closing value of the Dow Jones Industrial Average.

A Markov chain is a stochastic model describing a sequence of possible events in which the probability of each event depends only on the state attained in the previous event.. In probability theory and related fields, a Markov process, named after the Russian mathematician Andrey Markov, is a stochastic process that satisfies the Markov property (sometimes characterized as "memorylessness").
