In economics, an input-output model is a quantitative economic model that represents the interdependencies between different branches of a national economy or different regional economies. Wassily Leontief (1906-1999) is credited with developing this type of analysis and earned the Nobel Prize in Economics for his development of this model.

Input-output model - Wikipedia

Project management is the practice of initiating, planning, executing, controlling, and closing the work of a team to achieve specific goals and meet specific success criteria at the specified time. A project is a temporary endeavor designed to produce a unique product, service or result with a defined beginning and end (usually time-constrained, and often constrained by funding or staffing ...
