I enjoy reviewing in this book or previewing the lecture material for immunohematology. Since I print my powerpoint 6 slides/pg, this offers a nice blown up version of the pictures and diagrams my prof uses from the publisher.

Modern Blood Banking & Transfusion Practices

A blood bank is a center where blood gathered as a result of blood donation is stored and preserved for later use in blood transfusion. The term "blood bank" typically refers to a division of a hospital where the storage of blood product occurs and where proper testing is performed (to reduce the risk of transfusion related adverse events).

Blood transfusion is generally the process of receiving blood or blood products into one's circulation intravenously. Transfusions are used for various medical conditions to replace lost components of the blood. Early transfusions used whole blood, but modern medical practice commonly uses only components of the blood, such as red blood cells, white blood cells, plasma, clotting factors, and ...

"If the American people ever allow PRIVATE banks to control the issue of their currency, first by inflation, then by deflation, the banks will deprive The People of all property until their children wake-up HOMELESS on the continent their fathers conquered. The issuing power should be taken from the banks and restored to The People, to whom it properly belongs".
