other areas. This is because many systems can be seen as a network: proteins, computers, communities, etc. Which other systems could you see as a network? Why? 3. Artificial neural networks One type of network sees the nodes as artificial neurons™. These are called artificial neural networks (ANNs).

Free PDF eBook: Neural Network Programming with Java Learn how to create intelligent neural networks entirely in Java with nearly 250 pages on in-depth tutorials Vast quantities of data are produced every second.

### **Free PDF eBook: Neural Network Programming with Java**

One of the most preferred languages for neural network programming is Java as it is easier to write code using it, and most of the most popular neural network packages around already exist for Java. This makes it a versatile programming language for neural networks.
