Severe side effects from drugs can range from infections to death. If a drug has numerous reports of a particular problem, the U.S. Food and Drug Administration can add warnings to the drug's label, including its stringent black box warning.In rare cases, the drug is recalled or removed from the market.

Background: The Arctic is a key area of global climate change, with warming rates exceeding twice the global average. Many processes in the Arctic climate system are poorly represented in climate models because they are not sufficiently understood. Understanding of Arctic climate processes is limited by a lack of year round observations in the central Arctic.

Affordable Care Act Requires Insurance Companies to Justify High Rate Hikes Health insurance premiums have risen rapidly, straining pocketbooks for American families and businesses. Since 1999, the health insurance premiums for family coverage have risen 131 percent. Premium increases have forced families to spend more money for less coverage.
