DEFENSE TRANSPORTATION REGULATION

1-1 Chapter 1 Overview This chapter discusses the missions of the Army and air defense artillery as well as the role ADA plays in protecting the force.

Patriot Battalion and Battery Operations

The Low Signature Armored CAB (LSAC) adds ballistic and mine blast protection for the crew in a purpose-built cab that can be interchanged with a standard FMTV cab in eight hours. The LSAC cab can provide the crew protection from assault rifle rounds, land mines, and artillery fragments and still retain C-130 transportability on the some models, and can be installed on any FMTV vehicle in the ...

The Medium Extended Air Defense System (MEADS) program aimed to replace Patriot missiles in the United

States, the older Hawk system in Germany, and Italy's even older Nike Hercules missiles.

Beyond Patriot? The Multinational MEADS Air Defense Program

The AN/MPQ-64 Sentinel is a 3D radar used to alert and queue Short Range Air Defense (SHORAD) weapons to the locations of hostile targets approaching their front line forces. The Sentinel radar is deployed with forward area air defense units of the U.S. Army. It is an X-band range-gated, pulse-Doppler radar system. The antenna uses phase-frequency electronic scanning technology, forming sharp ...

The Future Combat Systems Manned Ground Vehicles (MGV) was a family of lighter and more transportable ground vehicles developed by BAE Systems Inc and General Dynamics as part of the United States Army's Future Combat Systems (FCS) program. The ground vehicles were to be based on a common tracked vehicle chassis. The MGV program was superseded by the Ground Combat Vehicle which has also been ...
